Summary

Change of all Gozo street lightening with energy efficient bulbs, a project with example of good multilevel cooperation between the Ministry for Energy and Conservation of Water, Enemalta, Transport Malta, Local Councils' Association and 14 Local Councils in Gozo.

The project is still not finalized, however good cooperation between the partners is already seen.

Project's results

Co-funded by the Intelligent Energy Europe
Programme of the European Union

| | |
|----------|---|
| Result 1 | Change all street lightening with energy efficiency bulbs |
| Result 2 | Decrease energy consumption by 60%-70% |
| Result 3 | |
| Result 4 | |
| Result 5 | |

Lessons learnt

Please write what was your experience of the project. What were the main factors for its success and what might have been done in another way.

Guideline: Write a few words about what were good examples that worked out well and things that would need extra attention next time.

Keywords: planning, result, resources, manpower, organization, technical knowledge, partners, funding, multi-level governance, exchange of information etc.

| | |
|----------|--|
| Lesson 1 | Cooperation between different levels of governance is of extreme importance for the success of a project and its implementation |
| Lesson 2 | Exchange of information is crucial- it was noticed that local councils are not aware who is the owner of the street lights, except those owned by the councils in the public parks. Exchange of information and regular communications between all level of governance should be improved for any other future activities |
| Lesson 3 | |
